9. Straplocked and CZARINA - Enemies Inside

=====

Weather (a2)

10. Espen Kraft feat VIC20 Somewhere or Nowhere (premiere)

Temperatures are up around the globe, with the exception of the North East seabord here....where we have a deep freeze. Some butterfly effect is happening, with a scorched earth causing a blaze of heat that may be everlasting. It'll be fine, because a Sunset shade may happen and we'll come out strong.
