California artist Johnatron who is part of the Girlfriend Records troupe has released a new single and they’ve kindly submitted it for play. It’s part of his upcoming album who’s tracks will be named after famous computer worms, such as this one that was developed by US and Israeli governments to hamper the Iranian nuclear program. This is Johnatron with “Stuxnet”, here on NFM.

We are going to play you out with the latest track from German artist NINA and Radiowolf, who are not only on a roll producing music like the Scala Hearts album with Ricky Wilde, but they are also touring with Cannons, playing at Hotline Bristol, and various other places. They are definitely keeping busy, and they somehow managed to release a new single. This is NINA and Radiowolf with "My Dark".

From all of us at NFM, have a great night!
